2014 Full Line Catalog

Second Edition

GATOR*OLOGY* *A system of methods and principles for quality.*

LIGHTWEIGHT CONSTRUCTION
This method of construction is a blend between dense foam and nylon. The interiors are constructed with a dense EPS foam that is shaped to create a "hard" case. Then we cover the foam with high quality 600 denier nylon to make it appear similar to a bag yet have the rigidity of a hard case.

DENIER NYLON
A strong nylon material that is used in the construction of bags. The higher the number, such as 600-denier, the better the quality. 600-denier is highly tear-and-water-resistant.

PE - HIGH DENSITY POLYETHYLENE
PE is a rugged plastic material which has a high resistance to impact. PE provides good performance in low temperatures where other plastics would crack and is highly resistant to both chemicals and moisture. Gator uses PE for the products that need to take the hardest beating on the road.

G-TOUR™
G TOUR™ is a Gator designed flight case with heavy-duty aluminum extrusions and rugged laminated plywood exterior.

ABS - ACRYLONITRILE BUTADINE STYRENE
ABS plastic has good impact resistance and impact absorption. It is easily formed to make all shapes and sizes. Gator uses ABS for the cases that are designed to offer strong hard case protection but do not need the extreme durability of PE.

EVA ETHYLENE-VINYL ACETATE
EVA is a polymer used to absorb physical shock. Gator uses EVA to give extra protection between foam and nylon along with forming tough contoured molded pieces.

ROTO-MOLD
The rotational molding process is a high temperature, low pressure plastic forming process that uses heat and biaxial rotation (rotation on two axes) to produce hollow, one piece parts. Gator utilizes roto-molding for large format products that require form fitting capabilities.

EPS FOAM – EXPANDED POLYSTYRENE
EPS is a thermal plastic material. It is formed to make a dense foam that is ideal for creating form fit protection for the product. Gator uses EPS to create case interiors and structures.

ELITE SERIES

The revolutionary Elite Air Series design features an oversized case with tailor-made contours and shaped foam strips to securely cushion each drum. The drum rests in the middle, away from side walls, which provides a snug fit and eliminates the need for foam. The unique shape is designed to accommodate most suspended mounting brackets without "upsizing" and comes with a limited, lifetime warranty against cracking.

The Elite Air Combination Tom case blends Elite's optimum protection with the convenience of one case. The contoured divider allows smaller toms to securely sit atop larger toms and is available for 10" & 12" and 12" & 13" tom combinations.

Model	Case Diameters Available
TOM CASE	8" - 10" - 12" - 13" - 14" - 15" - 16" - 18"
BASS DRUM CASE	18" - 20" - 22" - 24"
SNARE CASE	10" - 12" - 13" - 14"
COMBO CASE	10" / 12" - 12" / 13"

What makes the Elite Series Different?
The Drum Floats in the Center of the Case!

MADE IN USA

Rugged comfortable carry handles

Heavy-duty buckles lock the lids in place

Combo Tom Case includes contoured divider for secure stacking

EVOLUTION SNARE DRUM CASE SERIES

- Patended suspension system of molded-in suspension platforms with foam rubber pads center the drum and suspend it, by contacting the rim at only eight points. This floats the drum inside the case and creates air-space around the drum shell, hardware, and heads
- No pressure on the heads or shells means better tuning stability
- 2" wide web strap and YKK side-release buckle. Rated at 350lbs tensile strength
- Lightweight rotationally molded polyethylene plastic
- The octagonal shape creates extra room inside case to accommodate suspension mounts, hardware, and strainer throw-offs.
- Flat outer faces which provide a stable base for resting the case. No more rolling around
- Extra side crush protection; the top edge of the bottom shell is captured in the lid to prevent side impact from reaching the drum
- Outer case shell design includes ribs for added strength and secure stacking

Air Space

MADE IN USA
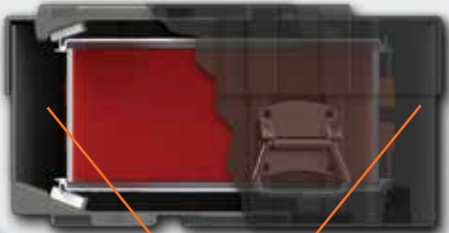

Model	Snare Case Diameters	Snare Depth
GP-EVOL13/1405SD	13" or 14"	5"
GP-EVOL13/1405.5SD	13" or 14"	5.5"
GP-EVOL13/1406SD	13" or 14"	6"
GP-EVOL13/1406.5SD	13" or 14"	6.5"
GP-EVOL13/1407SD	13" or 14"	7"

CLASSIC SERIES

Recognized as the industry standard rotationally molded drum cases, Protechtor Cases' Classic Series provides strength, durability and simplicity for almost any drum size. The rotational molding process gives added strength and durability to case corners and provides water resistance that non-roto molded cases can't match. Custom depths and colors are available. All Protechtor Cases come with a limited, lifetime warranty against cracking.

The Multi-Tom case features rounded pockets to make room for floor tom leg mounts. The 34" maximum depth allows for any combination of floor toms (up to 16" diameter), mounted toms and/or snares.

Model	Case Diameters Available
TOM CASE	8" - 10" - 12" - 13" - 14" - 15" - 16" - 18"

the Claw

XL lite series

This revolutionary spring-loaded, quick-release system provides quick bass drum mallet placement for 14 and 16 inch deep marching bass drums. The attractive and strong black anodized finish creates a slick yet subtle appearance with a strong aluminum edge for optimal protection against rim clicks.

MADE IN USA

Patent #7,164,074

Model	Description
GP-XLA-CLAW	Bass Drum Mallet Holder

ACCESSORY MOUNT

The Accessory Mounting Bracket securely mounts to the rim of any free floating drum and has been redesigned to provide a more compact and stable attachment for percussion accessories without muffling shell resonance. The universal F-clamp design provides multiple rod applications for hi-hats, cymbals, cowbells, jam blocks and ribbon crashers. Each rod comes with appropriate mounts, felts and a memory lock to make set-ups quick, easy and consistent with maximum stability.

POLYETHYLENE MOLDED SHOCK RACKS

Gator's lightweight Polyethylene shock racks are built for protection and function. The shock rack is specifically designed to allow 360 degree air ventilation around equipment to keep your gear lasting longer. Adjustable interior sliding support on each side of rack adjusts front to back and up and down for rear support of gear to eliminate shifting and jostling. Recessed side handles give your hands a break while the locking lid gives you peace of mind.

ROLLING RACK BASE

Rolling rack bases are made of lightweight Polyethylene plastic and conveniently fit under any Gator GRC or standard rack case. The four easy rolling wheels include 2 locking wheels for keeping the rack base in position. The heavy-duty twist latches and recessed side handles make it the ultimate pack and load solution.

Stacks beneath any Gator GRC Console or Standard rack

Model	Rack Units	Rack Depth
GRC-BASE-10	10	22.75"
GRC-BASE-14	14	22.75"

ROTO MOLD RACK CASES

Gator's virtually indestructible rotational molded Polyethylene rack cases are the ultimate in durability. The 19" deep rack cases are available in standard or rolling versions. All cases come with full sized front and rear rack lids for easy access. The rolling version includes a telescoping tow-handle and rugged in-line style wheels. These unique racks are available in several custom colors. The black version is made entirely from recycled materials.

Molded-in ergonomic side carry handles

Recessed steel twist latches

Built-in tow handle and wheels

RACK DRAWERS

Gator Cases offers a large selection of rack drawers designed for any of your rack needs. All Gator rack drawers feature fully enclosed 16 gauge cold roll steel construction. The heavy-duty smooth-glide drawer slides and spring-loaded latches make using these drawers effortless. The rack drawers are coated with a classic black powder finish for a clean, uniform look. For added security, drawers include a lock knock-out and a complimentary lock and key (not available on shallow rack models).

Standard Drawer features two 2" rubber grommets for rear cable access
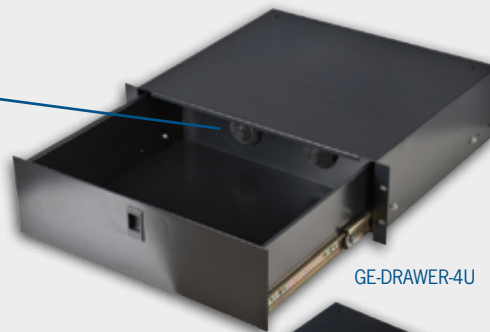

GE-DRAWER-4U

Wireless Drawer Features:

- 3U size drawer with wireless microphone nest
- Nest stores 4 wireless microphones, body packs, headsets and accessories
- Wireless storage accommodates microphones with clip still attached
- Body pack and microphone storage area lined with Polyethylene foam and Tricot covered plywood dividers

Wireless Drawer includes 11" microphone sections and foam storage compartment with cut-outs to hold up to 16 AA batteries
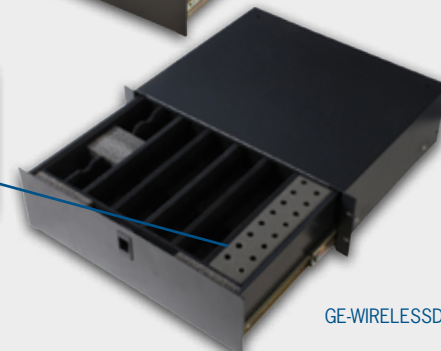

GE-WIRELESSDRWR

Wired Microphone Drawer Features:

- 2U Rack drawer stores 10 hard wired microphones
- Each microphone cavity is 6.5" x 2" x 2"

Wired Microphone Drawer features dense Polyurethane nest designed for microphone protection
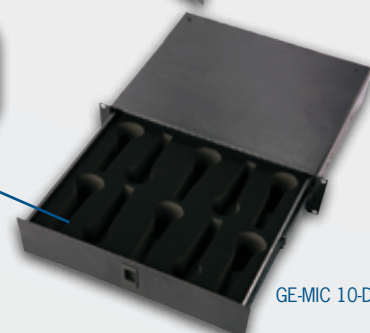

Divider Rack Drawer features Tricot covered adjustable wood divider system

Patented pop-up ratchet system for transporting your mixer flat then elevating to various angles during use

ATA TSA POP-UP MIXER CASES

Gator's Pop-Up Mixer Series uses the patented Pop-up ratchet system for transporting your mixer flat then elevating to various angles for a quick setup. The compact size allows for smaller transportation area requirements, but this case is big on features. The Pop-up mixers include a high density Polyethylene cabinet, TSA locking latches, threaded rack rails, black uninterrupted valance design, and comfort ergo-grip handles making this a perfect grab-n-go solution.

ROTATIONALLY MOLDED LCD/PLASMA CASE

Gator's G-LCD series is designed to offer serious protection and easy mobility to a wide range of consumer and commercial LCD / Plasma screens, with a price tag that still makes sense for today's value priced LCDs. Rotationally molded from rugged polyethylene plastic and featuring a unique molded screen support system, the G-LCD is sure to be the new standard in LCD transport. Made in the USA from recycled materials.

- Virtually indestructible LLDPE Polyethylene lightweight plastic construction
- (2) Unbreakable, molded-in handles on base for lifting and loading
- Aluminum extrusion handles for lid removal
- Built-in dry erase white board to label contents
- Heavy-duty 3" casters with rubber wheels; includes two swivel casters with brakes and two fixed casters for control and steering
- Heavy-duty 1.5" nylon web straps and YKK buckles secure lid to base
- Molded end supports with foam lining protect screen from shock
- Integrated "UP" arrows notify shippers to keep upright during transport
- Will accommodate most screens with pedestal stand attached
- The black case is made from 100% recycled material
- G-LED-3747-2X & G-LED-5055-2X each fit 2 LED screens per case & adjust from 1.5" to 3" depth
- Patent pending

iD
SERIES

GATOR
frameworks

ourbrand

Gator Frameworks was developed by musicians and audiophiles that are passionate about their gear. Every stand must meet the scrutiny of the product designers that "yes, this is the one I would choose to buy and use on stage, at work or in my home".

From the get go we wanted to do something new, something that looked sleek and that worked better than anything out there in the market today. From this ideology was born what we call our iD series, which is truly a new stand line from the ground up and is our iD in the market. This series incorporates clean lines that allow them to easily be stored and look elegant when in use. All the mechanisms were diligently thought through and tested to ensure they not only looked great but they worked in a way that was natural and easy to use.

At the core of all Gator Frameworks product design is the mission for it to be easy to operate and to hold up to extensive use. The handles, knobs and mechanisms are designed to operate in the most instinctive way and to feel comfortable in your hand. Our goal is to humanize every product. We utilize only the best of materials and have added attributes from the inside out such as thicker extrusion and anodized parts to every product to ensure that they will sustain the rigors of the field.

In the end our mission is to create products that you do not have to worry about. Products that do their job so that you can focus on what you are passionate about: your music.

The focus of Gator Frameworks is to ensure that every point that you operate your stand feels comfortable in your hand and functions smoothly. Every latch, clutch, knob and lever has been researched and designed around your hand to protect it and to make it smooth to operate. Functionally every stand is designed to operate as simply and natural as possible. Fine details like matte finished surfaces are a deliberate step to make the stand less intrusive on its environment whether at home or on the stage.
