m·a·x series

ddrum's new MAX series is a true triumph in drum tone. Pairing alder's dark focused and warm tone, with the cut, sustain and presence of maple; the MAX series achieves near perfect pitch and sustain, through the entire tuning range. Alder provides a natural separation between each note in the drum set arsenal, allowing every drum size to sit perfectly in the mix; whether live or in the studio.

reflex^{standard}

A first in the drumming world! Much like our experimentation with ash in previous lines, ddrum® has now turned to another tried and true tone-wood, alder! Used in guitars for years, this exceptional wood has a warm and focused tone, almost “naturally equalized”. We call it Aldertone®. It makes for a pure and focused drum sound, with smooth overtones and a warm decay.

NEW! reflex^{elite}

Reflex Elite in Gloss Natural Lacquer finish. Reflex shells are crafted from 100% Alder, a hardwood commonly used in guitar building, and first introduced as a relevant drum shell material by ddrum. Alder has a naturally balanced sonic characteristic, which emphasizes mid and low-end frequencies that provides both pristine clarity and enhanced tuning versatility. Reflex Series drums are equipped with solid brass Faceoff™ lugs, bass drum Isolifts™ for maximum low end, and Fixpitch™ suspension mounts, for cleaner pitch, better projection, and superior tone. The Reflex Select Series comes in three core configurations. Matching add-on drums are also available.

reflex standard

ddrum's Reflex Red kit is strikingly dressed in a hi-gloss black wrap and glossy cherry red powder coated hardware. This five-piece configuration includes drum sizes made popular by ddrum—a 7x13 snare for added sonic pop and a 20x22 bass drum for deep low end projection. 100% Alder shells provide pristine clarity, enhanced tuning versatility, and naturally balanced tone with added emphasis on mid and low-end frequencies. The Reflex Red kit features solid brass Faceoff™ lugs and ddrum's patented bass drum Isolifts™ and Fixpitch™ suspension mounts, which serve to minimize shell impedance for cleaner pitch, better projection, and superior tone

reflex bombardier

Punishing sizes - with pleasing tone. The warm, focused, alder punch of Reflex meets the gargantuan scale of our Bombardier configuration – which boasts ddrums largest shell sizes – for thunderous collective sound. With size and power like this, you better believe it works for rock. Yet, some drummers gaze into this Silver Sparkle Wrap and see further possibilities... like blues the weight of a water tower... or surf the size of a Waimea Bay wave.

journeyman double down

Bombast on a budget - without sacrificing quality. The power of Journeyman looms like a surging storm cloud in our Double Down configuration. Will you unleash its fury? Four cascading toms and two menacing basses give you plenty of ways to provide the thunder. Fittingly, only the color Black can truly match this kit's potential for menace.

journeyman rambler

Low-slung goodness, for all manner of beats. Journeyman's benefits are especially streetwise in our Rambler configuration. The boom of this bass drum, the smack of this snare, and the riding glory of three powerful toms ensure you'll never feel underpowered. All of our colors are street legal, and we've got all of you covered... whether you want you and your kit to cruise in relative stealth, or if you want to make sure you're loud and clear in the visual mix.

journeyman player

Maximum versatility, compact size, tremendous value. Journeyman's range of choices begins at a very solid square one with our Player configuration. The toms' pitch spread is pleasingly wide and usable. Combined with this street sweeper of a bass drum, and a snare drum that cracks with authority, you can't go wrong! Experience Journeyman, while you can, - it's out of this world!

ddrum TRIGGERS

ddrum is the industry standard when it comes to acoustic drum triggering. All models of ddrum triggers can be used on all acoustic and Mesh type drum heads. ddrum triggers are compatible with almost all popular drum modules that feature a 1/4 inch trigger input. ddrum triggers use a patented Vectored Amplitude Measurement (VAM) transducer to pick up drum strikes. This gives a natural response from the triggers when sampling drum sounds from a drum module. (EX. When hitting the drum softly the trigger responds with a softer sound).

RED SHOT TRIGGERS

A low-cost alternative with great tracking ability, but with stripped-down mechanical construction, and 1/4" connectors.

RS:	SMAP: \$19.00	LIST: \$31.50
