

## AUDIO SYSTEM

- In Proel Audio systems you will find products for almost every kind of application from the simplest product to fully expandable solutions. All Audio system products are manufactured using only the highest quality components, latest manufacturing techniques and advanced test procedures. Using our state of the art in house design and manufacturing facilities Proel can offer bespoke audio systems to customer specifications and requirements. All product is fully warranted and all components tested pre and post assembly to ensure long term reliability.

## SPLITTER

# ASP48

## SPLITTER

ASP48

	asp48
Structure	1 U rack 19" galvanized metal chassis
Frequency Response	20 Hz-20 kHz ( $\pm 0.3$ dB)
Input Impedance	mic: 2 k $\Omega$ line: 10 k $\Omega$
Max Input Level	mic: +20 dBv, line: +40 dBv.
CMRR	>90 dB @ 1 kHz (mic), >75 dB 50 Hz - 10 kHz
Electr. Output Impedance	<23 $\Omega$ (mic), <100 $\Omega$ (line)
Max Electr. Output Level	+3 dBm (mic), +23 dBu (line)
Max Electr. Output Load	200 $\Omega$ (mic), 600 $\Omega$ (line)
Max Transf. Output Level	+3 dBu
Transf. Output Impedance	<50 $\Omega$
Max Transf. Output Load	600 $\Omega$
T.H.D.	<0.05 % 20 Hz - 20 kHz @ 10 dB below clip
Phantom Power Supply	+48 volts with switch and led
Controls	gain switch (-20, -10, 0, 10 20, 30 dB)
Attenuation Switch (pad)	-0 / -20 dB
Mic/Line Switch (out 1 and 2)	+20 / 0 dB
Channels	n.4 independent channels or internally connected
Inputs (single ch)	n.1 XLR 3-pole back panel mount plug
Outputs (single ch)	n.2 XLR 3-pole back panel mount plugs (out 1 and 2) n.2 XLR 3-pole front panel mount plugs (out 3 and 4)
Noise (e.i.n.) 20 Hz - 20kHz	<-108 dBu (-20 dB gain) <-117 dBu (-10dB gain) <-121 dBu (0 dB gain) <-122 dBu (10 dB gain) <-122 dBu (20 dB gain) <-122 dBu (30 dB gain)
External Power Supply	$\pm 25$ Vdc, +48 Vdc from PSU2 only

• The new ASP48 is an innovative 4 channels (independent or internally interconnected) active splitter featuring 4 inputs and 16 outputs (8 are electronically balanced and 8 are balanced by transformer). It is able to supply 4, 8, 12 or 16 outputs from just one input signal, all in 1-unit 19" rack. Each channel is characterized by an input featuring the possibility of 48V Phantom feeding, type of input selection (LINE/MIC), adjustable gain ranging from -20dB a +30dB, input signal attenuation PAD, CLIP signalling and CUE function. The ASP48 must be fed by the PSU2 double feeding unit. Each PSU2 can feed 12 ASP48 under the configuration "single feeding", or 6 ASP48 under the configuration "double feeding". Thanks to the 12-LED Vu-meter it is possible to visualize the level of the signal sent by the ASP48s with the CUE function and to monitor such signal by means of the two headphone outputs. Moreover, it is always possible to keep under control the correct working of the two two PSU2 power suppliers thanks to the feeding state LED.

PSU2

	PSU2
Structure	2 U rack 19" galvanized metal chassis
DC outputs	+25 V unregulated @ 4 A max: low ripple -25 V unregulated @ 4 A max: low ripple +48 V $\pm 5\%$ regulated @ 500 mA max
DC indicators	3 leds for each power supplier (post fuse) +25 V -25 V +48 V
Headroom Meter	12 led meter + clip
Headphone Output	2 x 1/4" stereo jack load impedance: 30 $\Omega$ to 600 $\Omega$ output: 860 mW (30 $\Omega$ ) 750 mW (200 $\Omega$ )
Power Supply	230 V AC 50 Hz or 115 V AC 60 Hz

## ASP48

• Mic/line active splitter with 4 channels (1 input and 4 outputs for each channel) able to provide 4, 6, 8 or 16 outputs from just one input signal, 1-unit 19" rack.

## PSU2

• Separated power supply unit for ASP48 with double headphones output (output signal monitoring) and practical 12 LED Vu-meter. Each PSU2 is able to feed 12 ASP48 under the configuration "single feeding", or 6 ASP48 under the configuration "double feeding".

## STAGE GEAR

**DI BOX •** D.I. Boxes (Direct Injection Boxes) are part of the essential set of tools required for any professional live sound situation or application where the audio devices feature different levels, impedance and connection. Transforming audio signal from unbalanced to balanced, D.I. Boxes reduce the possibility of electrical disturbances on the line - especially over long lines such as from a musical instrument to the FOH mixing console.

Part of the new Proel Stage Gear series, the new D.I. Box range is comprised of three different models: a single channel active D.I. Box (DB1A), for use by professional musicians and sound engineers for rental, touring, studio and installation applications; a single channel passive D.I. Box (DB1P) designed for applications where it is not possible or not practical to power the box; a dual channel model (DB2A), particularly suitable for DJ use and for musicians using stereo equipment.

The circuitry of each model has been designed with the maximum care. The electronic components, including the isolation transformers (DB1A, DB1P) and low-distortion IC, have been carefully selected, in order to guarantee a clean, hum-free signal transmission from the instrument to the mixing consoles, even on very long cables, without impedance matching problems.

The innovative mechanical design of the three models includes an aluminum shell and rubber corners, which provide the best protection for the use in the toughest situations. When the two rubber corners are removed, two guides are exposed, allowing the coupling of two DI units which can then be mounted in a 19" standard rack (rack ears included). This unique feature is extremely convenient for engineers who need to use a large number of DI BOXES in the same application.

On the front panels a wide choice of connectors is available (XLR, JACK and RCA, depending on the model), allowing easy connection from a wide range of sources, including keyboards and samplers, guitar and basses, PC audio cards and any type of music player.

The ACTIVE versions can be powered with 48V phantom from the mixing console, with 9V battery or, in large applications using many DI BOXES, with an external 9V power adapter that can be daisy-chained using the double power connector on the rear panel.

19" rack mounting kit included

## STAGE GEAR

## DB1A

• This single-channel, top-of-the-range active DI BOX has been designed to fit into the most demanding setups and applications with an outstanding performance. In order to provide a full isolation between the musician gear and the sound reinforcement system and to avoid ground loops and hum noises, DB1A includes an MU-METAL core transformer able to reduce phase and harmonic distortion to a minimum, with noticeable improvement of the acoustic response. The audio integrity is guaranteed by low-noise, low-consumption IC for balancing the signal, able to handle very low-impedance loads. The input section features JACK and XLR connectors with link possibility and a PAD of up to 30 dB that permits very high-level signal inputs to be used.

## DB2A

• DB2A is an active 2-channel DI BOX that represents the most convenient solution for a long-distance, hum-free transmission of stereo signals. For obtaining the best electronic performance, DB2A uses SMD components and low-noise IC for balancing the signals. Any ground-loop problem is eliminated by the differential input design, while the complete set of connections and the PAD up to 30 dB allows any kind of source to be fed in. DB2A is particularly suited for the use with stereo keyboards, DJ equipment and PC-based audio systems.

## DB1P

• DB1P is a single-channel passive DI BOX equipped with the same type of MU-METAL core transformer used in the DB1A, which provides minimum distortion, linear phase and hum-free transmission also on very long cables. Thanks to the input stage design, DB1P can accept also signals coming directly from the power output of instrument amplifiers. A specially designed MAKE-UP filter at 4 KHz is also available for cutting any hiss or buzz noise coming from acoustic or electric guitar and basses.

	DB1A	DB2A	DB1P
System Type	1 channel active DI	2 channel active DI	1 channel passive DI

## AUDIO DISTRIBUTION SYSTEMS

### "SASOX" - "SAMIL"

#### SASOX48

• 19" rack 3U module wired with 4 SOCAPEX connectors (19P) and 8 Speakon connectors for amplified signal distribution in audio systems.

#### SAMIL37

• 19" rack 2U module with one (37P) bayonette male connector, 1 (37P) bayonette female connector, 12 XLR3M and 4 XLR3F connectors for audio signal distribution.

## STANDARD STAGE GEAR - "DB" Series"

#### DB1CH

• Audio signal passive balancing system with earth cut-out switch and signal attenuation device. Ratio 1:1 at high impedance. Input/Output with Ø 6.3 mm mono jack socket, balanced output with 3P XLR panel mount male connector.

#### DBA1CH

• Audio signal active balancing system. Input with Ø 6.3mm mono jack socket, 1 output link, 1 non-balanced output, 1 balanced front output and 1 parallel back output. Two 9V inner batteries feeding, 12 Vdc adapter socket or + 48 V Phantom Power Floor or 19" rack installation using the ADRK1AZ/ADRK2AZ accessory (battery not included).

	DBA1CH
STRUCTURE	Galvanized metal chassis with antiskid feet
FREQUENCY RESPONSE	20Hz - 20kHz (+0 -2dB)
SIGNAL/NOISE RELATIONSHIP	100dB (0dB gain)
INPUT IMPEDANCE	1 MOhm (normal) - 10KOhm (pad)
OUTPUT IMPEDANCE	330 Ohm (balanced) - 2200 Ohm (unbalanced)
T.H.D.	< 0.025% (gain 0 dB) < 0.12% (gain +20 dB)
PHANTOM POWER SUPPLY	+15/+48 Volts with 1mA @11000hm
CONTROLS	Ground/lift. switch Attenuation switch -20dB Normal/pad switch
INPUTS	n.1 Ø 6.3 mm mono jack socket (link)
OUTPUTS	n.1 mono jack socket Ø 6.3 mm (balanced) n.1 XLR 3P panel mount male plug (unbalanced)
INNER POWER SUPPLY	2 x 9 Volts batteries (not included)
EXTERNAL POWER SUPPLY	12 Vcc - Jack socket Ø 2.1 mm

	DB1CH
STRUCTURE	Galvanized metal chassis with antiskid feet
FREQUENCY RESPONSE	20Hz - 20kHz (+0 -0.3dB)
NOMINAL IMPEDANCE	600 Ohm
INPUT IMPEDANCE	<400 Ohm
LOAD IMPEDANCE	600 Ohm
MAX INPUT LEVEL	+19 dBu @ 20Hz +29 dBu @ 50Hz
CONTROLS	Ground/lift. switch Attenuation switch -20dB
INPUTS	n.1 Ø 6.3 mm mono jack socket
OUTPUTS	n.1 Ø 6.3 mm mono jack socket n.1 XLR 3P panel mount male plug.

## AUDIO STAGE BOXES

### "EZ" SERIES

#### EZBOX1204 EZBOX1604

• Comfortable, practical, compact. These are the words that can be used to describe the new PROEL EZ BOX. This stage box features an original design allowing the cable to be wrapped around the structure for transport and allows the box to be used comfortably both upright or laying down. The EZBOX features high quality, resistant PROEL connectors and is available in two different formats (EZBOX1204/EZBOX1604) making it the ideal choice for the touring musician and the rental company who need high quality connections on stage without carrying around bulky flight-cases. Designed for use on stage for the connection of drum kit microphones, for large keyboard rigs, or - in the case of the smaller band, as the main multicore system. EZBOX combines practicality, convenience and portability into a box that can only be described as easy to use.

## AUDIO STAGE BOXES

### "TN" Series

**TN** • Galvanized metal sheet stage box with highly resistant epoxy paint. Built in accordance with the security regulations in force at present, and manufactured with the most sophisticated equipment. XLR metal connections, "CMN" series multicore cable with separate earth and high quality assembly. 80/20 tin welding. Cable mount terminal covers highly resistant to temperatures up to 150°C. Configurations up to 40 channels.

## PROFESSIONAL AUDIO STAGE BOXES "NK" Series

BOX2408S

PANEL

**NK** • PROEL "NK" series of audio systems offers highly flexible stage boxes, built in 19" rack automatic stage boxes, black epoxy finish metal, allowing any kind of configuration. The NK series is fitted with CMIL multipin connectors allowing cable disconnection from stage box for an easy installation even with very long cables. Multicore cable with separate earth (CMN). CMIL and XLR connections are made of high quality metal. Shunt protection are realized with high-mechanical resistance jackets. Combinations up to 48 channels, custom configurations. All cables are fitted with high quality connectors, multipin bayonet-mount connectors and CMN earth separate cable.

## PROFESSIONAL AUDIO STAGE BOXES "SN" Series

REAR VIEW  
WITH SPLITTING  
MODE EXAMPLE

### SN

• Designed for professionals requiring high-quality audio systems for audio signals routing in different applications. CMIL multipin connectors are bayonet mounted, allowing an easy disconnection from stage box. Assembled with CMT series professional multipair cables, individually shielded. "SN" series Stage Box is fitted with input and output connectors on the front or rear box panel. These systems can be made also with the supply of AV series cable drums.

## PROFESSIONAL AUDIO STAGE BOXES "USAW" Series

### USAW

- The new USAW series is realized with a highly resistant Epoxy powder finish metal box. It is manufactured according to the current security regulation parameters and processed with the most advanced equipment. XLR plastic connectors welded on circuit, featuring a switch for each ground/lift channel. Multipin screw mount connectors are employed in their manufacturing in order to grant maximum reliability. It also offers the possibility of direct output from the box and convenient feature of both rack and wall mounting. Combinations up to 48 channels, also under Split configuration.

USAW3208

<b>FREQUENCY RESPONSE</b>	20Hz - 20kHz (+0.5dB @ 10 dBm input)
<b>INPUT IMPEDANCE</b>	600 Ohm
<b>OUTPUT IMPEDANCE</b>	600 Ohm
<b>INPUT MAX LEVEL</b>	+26dBu.
<b>CORE</b>	MUMETAL
<b>PRIM. STATIC RESISTANCE</b>	272 Ohm
<b>SEC. STATIC RESISTANCE</b>	338 Ohm
<b>T.H.D.</b>	< 0.1% 20Hz - 20kHz @ 10dB
<b>CONTROLS</b>	earth switches.

## MULTIPIN AUDIO CONNECTORS Bayonet "CMIL" Series

### CMIL

• PROEL "CMIL" series is made with UNI 5075 / UNI 6060 aluminium alloy worked with CNC machines, subjected to galvanic treatment and finished according to MIL standards. It features a variety of combinations ranging from 19 to 150 poles. Bayonet locking system with 3 ramps on the housing grants a perfect mating. Crimp and solder contacts, silver or gold plated. Contact connection low resistance grants line or microphone audio signals not to have attenuations or alterations. Connector covers are available to protect contacts against mechanical stress. Electrodeposition of black paint (F6) cataforesis in accordance with RoHS. Working voltage: 700Vdc / 500Vac class A / 250Vdc / 200Vac class I. Working temperature: - 55 / + 125 C°.

PIN**TPF85**

• Closing cap for n. 85/100/150 contacts male plug with bayonet locking system. Equipped with nylon covered stainless steel rope.

TPF85

**CMIL150MV**

• Aluminium cable mount male plug with bayonet locking system, n. 150 gold plated contacts.

CMIL150MV

150  
PIN**CMIL150FP**

• Aluminium panel mount female receptacle, n. 150 gold plated contacts.

CMIL150FP

150  
PIN**TPM85**

• Closing cap for n. 85/100/150 contacts female socket with bayonet locking system. Equipped with nylon covered stainless steel rope.

TPM85

**CMIL150FV**

• Aluminium cable mount female socket with bayonet locking system, n. 150 gold plated contacts.

CMIL150FV

150  
PIN**CMIL150MP**

• Aluminium panel mount male receptacle with bayonet locking system, n. 150 gold plated contacts.

CMIL150MP

150

## AUDIO SYSTEM ACCESSORIES - "WALL MOUNT" Boxes

### SKAWM8

• Recessed electrically zinc-plated perforated stage box, 65mm inner useable depth, including scratch-proof epoxy powder paint finish galvanized metal sheet connection plate for 8 XLR, black finish. Master pack: 1 pc.

SKAWM8

### SKAWM16

• Recessed electrically zinc-plated perforated stage box, 65mm inner useable depth, including scratch-proof epoxy powder paint finish galvanized metal sheet connection plate for 16 XLR, black finish. Master pack: 1

SKAWM16

### SKAWM20

• Recessed electrically zinc-plated perforated stage box, 65mm inner useable depth, including scratch-proof epoxy powder paint finish galvanized metal sheet connection plate for 20 XLR, black finish. Master pack: 1 pc.

SKAWM20

## AUDIO SYSTEM ACCESSORIES

### BALE17

- Nickel plated Ø 1 mm steel wire snake cable bale for 17-25 mm multipair cable holding.

### BALE20

- Nickel plated Ø 1 mm steel wire snake cable bale for 20-28 mm multipair cable holding.

### BALE28

- Nickel plated Ø 1 mm steel wire snake cable bale for 28-38 mm multipair cable holding.

Mechanical protection of cables and bundles of cables.

### COMMON PARAMETERS

Tensile Strength	84.5 Mpa/cm <sup>2</sup> (Astm D638)
Max Elongation	350% (Astm D638)
Specific Gravity	1.37 (Astm D729)
Max Temperature	0 ~ 40 °c
Friction Coefficient	0.19 (Astm D1894)
Copper Contact Corrosion	None (Astm D271)

### INTERNAL DIAMETER (NOM/MIN/MAX)

PROELFLEX2BK	2/1.5/4 Mm.
PROELFLEX8	8/6/14

### MEDIUM WEIGHT

PROELFLEX2BK	2.25 Gr/mm.
PROELFLEX8	6.9 Gr/mm.

### COLOURS

Black (Bk)

### PROELFLEX2BK PROELFLEX8

- PROELFLEX twisted tubular sleeve is made of resin monofilament for mechanical protection of cables and bundles of cables. The "spring" effect of this protective sleeve allows covering cables of several dimensions and limited diameter, and also using the sleeve on a large length. Operating temperature range: -50°C/+150°C. Colour: black. Available in 100 mt reels.

PROELFLEX2BK - PROELFLEX8

### HANDYBOX

- HandyBox heat-shrinkable sleeves are available in 4 dimensions in black colour. The typical applications of heatshrinkable sleeves are: electrical insulation, sleeve and cable repair, wire or other material identification, anti corrosion protection. Made of polyolefin, they feature an excellent mechanical strength. The shrunk size is approximately 1/2 of original diameter. Operating temperature range: -55°C/+125°C.

CODE	Inch	Ø Before shrinking	Ø After shrinking	Thickness	Length
PROEL48BK	3/16"	4.8 mm.	2.4 mm.	0.50 mm.	8 mt - 26.25
PROEL64BK	1/4"	6.4 mm.	3.2 mm.	0.60 mm.	6 mt - 19.68
PROEL95BK	3/8"	9.5 mm.	4.8 mm.	0.60 mm.	5 mt - 16.40
PROEL125BK	1/2"	12.7 mm.	6.4 mm.	0.60 mm.	5 mt - 16.40

## AUDIO SYSTEM ACCESSORIES

### "GAFFA TAPE"

### EMPTY CABLE DRUMS

#### "AV" Series

#### GAFFABK GAFFAGR

- Cloth gaffa tape, 50 mm wide and 50 mt long roll. Available colours: black (GAFFABK), grey (GAFFAGR) and white (GAFFAWH)

GAFFABK - GAFFAGR - GAFFAWH

#### GAFFAGNF GAFFAYEF

- New professional fluorescent cloth gaffa tape, 50mm wide and 50 mt roll length. Suitable to use on the stage for the evidence of possible obstacles and access/exit ways. Available in fluorescent green (GAFFAGNF) and fluorescent yellow (GAFFAYEF).

GAFFAGNF

GAFFAYEF

#### GAFFAPROBK

- New professional strong and waterproof matt Black cloth gaffa tape 50mm wide and 50 mt roll length. Suitable to use on the stage. Available in black colour.

GAFFABKPRO

## EMPTY CABLE DRUMS- "AV" Series

#### AV100

- Blind ABS cable winder with metal structure, adjustable brake and crank handle. Easily adaptable to "Stage Box" audio systems by using connectors on the external flange. External diameter: Ø 320 mm.

#### AV150

- Empty metal cable winder with smooth central flange, without sockets. External diameter: Ø 320 mm. Master pack: 1 pc.

#### AV200

- Blind ABS cable winder with metal structure equipped with Ø 80 mm wheels, adjustable brake and crank handle. Easily adaptable to "Stage Box" audio systems by using connectors on the external flange. External diameter: Ø 420 mm.

#### AV300

- Metal cable winder with epoxy powder paint finish, friction brake to adjust speed of rewind system and crank handle. Easily adaptable to "Stage Box" audio systems by using connectors on the external flange. External diameter: Ø 420 mm.

#### AV310

- Professional cable winder with sturdy paint finish metal, PROEL AV310 is a high capacity drum, equipped with an adjustable brake, rewind system, crank handle and four Ø 60 mm. wheels. Easily adaptable to "Stage Box" audio systems by using connectors on the external flange. External diameter: Ø 450 mm.

## EMPTY CABLE DRUMS "AV" Professional Series

AV400 - AV410

### AV400

• Sturdy paint finish metal cable winder, removable crank handle, adjustable friction brake, separating flange to secure bulky cable end connectors in separate compartments. Overall diameter: Ø 440 mm.

### AV410

• Sturdy paint finish metal cable winder, wheels for easy transport, removable crank handle, adjustable friction brake, separating flange to secure bulky cable end connectors in separate compartments. Overall diameter: Ø 530 mm.

### AV420

• High capacity sturdy paint finish metal cable winder, removable crank handle, adjustable friction brake, separating flange to secure bulky cable end connectors in separate compartments. Overall diameter: Ø 820 mm.

### AV430

• High capacity sturdy paint finish metal cable winder, removable crank handle, adjustable friction brake. Easily adaptable to an "Stage Box" audio systems by using connectors on the external flange. Overall diameter: Ø 770 mm.
